

The *Nelson Maths: Australian Curriculum NSW* series supports the implementation of the NSW Mathematics K–6 Syllabus for the Australian Curriculum.

The program provides between 30 and 33 units of work for each year level, with each unit divided into three lesson plans. Providing flexibility, each lesson plan can be tailored to cater for students' different learning styles and diverse needs.

The series comes complete with Student Books, Teacher's Resource Books with CD-ROM and a Nelson Teaching Objects CD-ROM to assess students' understandings for future planning and learning.

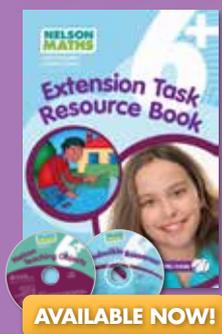

6+ EXTENSION TASK RESOURCE BOOK

We're happy to announce a new addition to the *Nelson Maths: Australian Curriculum* series, an initiative to support advanced students. Introducing the **Year 6+ Extension Task Resource Book!**

This book features stimulating activities designed to challenge students who are excelling in mathematics and would benefit from more difficult learning tasks.

The author has created these tasks so that they broaden students' understandings, reasoning and problem-solving skills within the Year 6 curriculum, while providing them with 'bridging' activities into the Year 7 curriculum.
